Agenda

STRONG FIRST HALF-YEAR FOR SCHIPHOL CARGO HUB

Cargo has shown strong growth during the first six months of 2006 compared with the same period last year. Volume grew by 36,500 tonnes representing an increase of 5.2%.

The full freighter segment again reflected the strongest growth, up by 28,000 tonnes or 7%. During the same period the number of full freighter movements declined by 4.7% because various carriers no longer stop at Amsterdam Airport Schiphol to refuel.
The strongest growth was achieved by (westbound) traffic to and from Asia. Cargo tonnage was up by 26,000 tonnes compared with the first half of 2005, up by 9.5%.

The North American region saw marginal negative growth amounting to 1,500 tonnes, down by 1.4% during the first six months of 2006. All other regions - South and Central America, the Middle East and Africa - reflected growth.

Agenda

> continue from page 6

The strongest volume increase in the full freighter network was achieved by Singapore Airlines Cargo and KLM Cargo. In addition, China Southern and Emirates and 'newcomers' AirBridge Cargo en LAN Cargo performed well.
Prospects for the second half of 2006 are favourable. Great Wall started operating six-weekly flight services to Shanghai in June and Chinese carrier Jade Cargo starts operating cargo services to Shenzen, three times a week in August.
For a detailed analysis of cargo developments at Amsterdam Airport Schiphol, please contact the Cargo Marketing department of Amsterdam Airport Schiphol (tel: +31 20 601 4530 or email cargo@schiphol.nl). ■
