About Amsterdam Airport Schiphol

Amsterdam Airport Schiphol is easily accessible and perceptibly linked with the entire world. As such it is a unique, cosmopolitan and inspiring location for successful and meaningful business operations with Dutch as well as international contacts. Schiphol offers a pleasant, secure environment with a wide range of buildings, facilities and services, and where many prominent businesses and other organisations are located.

As a business location we are driven by the ambition to create an inspiring environment where organisations and employees are encouraged to achieve the best results. We are happy to provide our tenants, their employees and guests facilities where they can work, meet, gain new experiences and together attain new insights in a pleasant environment. With this objective in mind we continuously focus our efforts on the ongoing development of the area, including landscaping and the buildings located at Schiphol.

Schiphol Real Estate actively joins forces with its tenants to find solutions that perfectly match the housing requirements of their organisations. We do so in the knowledge that every organisation – whether small or large, old or new, expanding or shrinking, driven by production or by knowledge, operating in aviation, logistics or any other sector – has its own, unique demands when it comes to accommodation.

If you are looking for more information or just wish to discuss the possibilities, entirely free of obligation, do not hesitate to contact Schiphol Real Estate at +31(0)20 6012888 or realestate@schiphol.nl

Hiring space according to your own preferences

No two organisations have the same accommodation requirements. Some may know exactly how much space is needed and wish to set this down in a longterm agreement, while others prefer a short-term lease that can be extended on a continuous basis. Additionally, while some organisations prefer to furnish their offices according to their own wishes, others would rather be housed in a shared full-service office that offers reception and catering facilities.

With a wide range of lease options whose scope extends far beyond that of the traditional standardised lease, Schiphol Real Estate can offer you an accommodation solution that matches your needs to perfection.

We also cater to tenants who prefer a combination of different lease types for specific portions of the space they lease. Arrangements such as these enable our tenants to render their business accommodations future proof as well as financially attractive by combining their core space with a 'flexible shell' of space that can be used on a temporary basis, or additional space which they may use whenever they wish.

- For long-term security
- Competitive conditions
- Leased as a shell, furnished according to your own preferences

Sure2Stay

The advantages of a longer lease term

• Open-ended lease

• but can be cancelled at any time
