

Schiphol Nederland B.V.

Interim financial statements
for the period from 1 January 2009 to 30 June 2009

2009 INTERIM REPORT

Schiphol Nederland B.V. is part of Schiphol Group and uses the group exemption facility provided under Section 2:403 of the Netherlands Civil Code. The interim financial statements of Schiphol Nederland B.V. for 2009 comprise the company mid-term financial statements, the interim report and a statement by the Management Board of Schiphol Nederland B.V.

The financial figures of Schiphol Nederland B.V. for the first half of 2009 have also been incorporated into the consolidated interim report of its parent company, Schiphol Group (N.V. Luchthaven Schiphol trades under the name of Schiphol Group) for the first six months of 2009. Schiphol Group's consolidated interim financial statements for the first half of 2009 have been drawn up in accordance with the International Financial Reporting Standards as accepted within the European Union (IAS 34). Schiphol Group's interim report for the first half of 2009 is available on the following website: www.schiphol.nl/SchipholGroup1.htm.

The interim financial statements of Schiphol Nederland B.V. for 2009 have not been subjected to an audit or limited review by an external auditor.

Key events in the first six months of 2009 and their effects on the interim financial statements

Below is an overview of the most important events in the first six months of 2009 and their effects on the interim financial statements:

- in the first six months of 2009, Amsterdam Airport Schiphol processed 11.0% fewer passengers, 26.5% less cargo and 9.2% fewer air transport movements. The fall in passenger numbers and passenger spending at the airport has had a negative effect on the revenue from the operation of shops and car parks and from the granting and management of concessions for shops and food service outlets. However, total revenue has risen due to an 8% increase in airport charges and a slight increase in revenue from real estate operations and other activities;
- a provision of EUR 32.3 million drawn for the organisational change that had been decided upon at the beginning of 2009. The organisational change is to lead to a reduction in the workforce by the end of 2010;
- a fall in the value of real estate of EUR 26.1 million (3.6% of the value of the relevant properties);
- an impairment of contract-related assets of EUR 6.3 million due to lower sales forecasts for alcohol and tobacco;
- an increase in the net financial expense by EUR 29.5 million, due to the rise in interest-bearing debts in the second half of 2008, which can be attributed in part to the super dividend distribution and the 8% cross-participation in Aéroports de Paris (ADP).

The combined effect of these material events contributed to the fall in the operating result. For further details on material events for Schiphol Group, we refer to the interim report of Schiphol Group for the first half of 2009.

The principal risks and uncertainties for the second half of 2009

Schiphol Nederland B.V.

The principal risks and uncertainties for the second half of 2009 are not expected to deviate materially from those described on pages 73-77 of the 2008 Annual Report of Schiphol Group. With respect to Schiphol Nederland B.V. we should specifically mention the risks and uncertainties relating to the development of traffic and transport and consumer spending at the airport in light of the economic crisis, and the effect of cost-saving measures in the second half of 2009. The Management Board would also specifically like to mention the potential effects of a flu pandemic on traffic and transport volumes and airport operations. Plans have been developed to ensure the continuity of all vital airport processes under such circumstances.

Statements by the Management Board

The Management Board members specified below hereby declare that, to the best of their knowledge, the company financial statements for the first six months of 2009 prepared in accordance with the accounting principles and policies described on pages 6 and 7 give a true and fair view of the assets and liabilities, the financial position and the profits of Schiphol Nederland B.V. and that the interim report faithfully reflects the information to be disclosed under Section 5.25d, paragraph 8 of the Netherlands Financial Supervision Act.

Schiphol Nederland B.V.

Notes to the company balance sheet as at 30 June 2009 and the company profit and loss account for the first half of 2009

Accounting policies

General

Schiphol Nederland B.V. uses the group exemption facility provided under Section 2:403 of the Netherlands Civil Code. Pursuant to this scheme, Schiphol Nederland B.V. is exempted from the obligation to prepare its financial statements in accordance with the International Financial Reporting Standards as accepted within the European Union or under Title 9, Book 2 of the Netherlands Civil Code. Instead, it is sufficient for Schiphol Nederland B.V. to publish a balance sheet and profit and loss account that disclose at least the information referred to in Section 2:403, paragraph 1(a) of the Netherlands Civil Code. Section 2:403 does not lay down any requirements with respect to the accounting principles and policies to be used by Schiphol Nederland B.V. for the classification and valuation of its financial statements, nor requires the publication of notes to those financial statements. This means that, in principle, Schiphol Nederland B.V. is free to decide which accounting principles and policies to use and which notes to provide.

In accordance with Section 5:25d, paragraph 5 of the Financial Supervision Act, the interim financial statements of Schiphol Nederland B.V. for 2009 include the same items, headings and subtotals as its 2008 financial statements. Furthermore, the interim financial statements of Schiphol Nederland B.V. for 2009 have been prepared in accordance with the same accounting principles and policies for classification and valuation as those used in the 2008 financial statements, as explained in further detail below.

Facts and circumstances which have emerged since 27 August 2009 have not been taken into account in these interim financial statements of Schiphol Nederland B.V.

Assets

Assets, used for operating activities are stated at historical cost, net of received investment facilities, straight-line depreciation and impairments. Investment property is stated at fair value. This also applies while this property is still part of the assets under construction or development, provided that the fair value can already be measured reliably at that time. While this is not yet possible, the property is stated at historical cost.

Associates are valued on the basis of the equity method, which means that they are initially stated at cost, which cost is then adjusted for our share in the movements in the equity of the associate. The valuation of associates includes the goodwill that arose upon their acquisition. The share of the company in the results is recognised in the profit and loss account (under 'share in results of associates').

Current assets are stated at fair value, which is in principal the face value. Transactions (investments, revenue and costs) in foreign currency are recognised at the settlement rate. Monetary assets and liabilities (receivables, debts and liquid assets) in foreign currency are converted at the rate on the balance sheet date.

Schiphol Nederland B.V.

Equity

Equity comprises the issued capital at nominal value and other reserves.

Debts

Debts are stated at fair value, which is normally the nominal value.

Provisions

Provisions are created for legally enforceable or actual liabilities that exist on the balance sheet date, are likely to necessitate an outflow of resources and can be reliably estimated. Other provisions are stated at the present value of the associated liability if the effect of the time value of money is material and can be reliably calculated.

Revenue

Many activities generate turnover that qualifies as turnover from the provision of services (airport charges, concession fees, rents and leases and parking fees). This turnover is recognised in proportion to the performance delivered by the time of the balance sheet date, provided that the result can be reliably estimated. The turnover from retail sales is generated by the sale of goods and is recognised at the moment when these sales transactions, effected exclusively in cash, take place.

Revenue is understood to refer to the income from services provided, net of discounts and turnover taxes (VAT and excise duties). Costs are recognised in the profit and loss account in the year in which the related turnover is recognised.

Financial income and expenses

Interest income and expense are recognised on a time-weighted basis, with due regard for the effective yield of the asset. Dividends are recognised at the moment the company acquires the right to receive them.

Warning with respect to future-oriented statements

The risks associated with business operations could result in discrepancies between actual results and the results described in forward-looking statements in this document.

Regulated information

The 2009 interim financial statements of Schiphol Nederland B.V. qualify as “regulated information” within the meaning of Sections 1:1 and 5:25d of the Netherlands Financial Supervision Act.
