Airport charges

The airport charges applicable at Amsterdam Airport Schiphol consist of Landing and Take-off charges, a Passenger Service Charge, a Security Service Charge and a Parking charge.

Landing and Take-off charges

The amount to be charged for an aircraft landing and an aircraft taking off is determined by the following elements:

- I the aircraft's weight (MTOW)
- II the aircraft's noise category
- III the point in time of arrival at and departure from the airport

A distinction is made between flights and cargo flights.

A distinction is also made between handling at a connected stand and handling at a disconnected stand.

Passenger Service Charge and Security Service Charge

The Passenger Service Charge and Security Service Charge apply to departing passengers. A distinction is made between departing local passengers and departing transfer/transit passengers. Infants under two years of age are excluded.

Parking charge

The parking charge is payable per 24 hours or a part thereof. No parking charge applies if the parking period is less than 6 hours and 15 minutes. The night hours are exempted from parking charges.

Noise category

The noise category of an aircraft can be determined on basis of its noise certification. The EPNdB must be defined within the Chapter 3 or Chapter 4 certified aircraft category. Seven noise categories are distinguished:

■ Category S1	$\Delta\text{EPNdB} > -10$
■ Category S2	$-10 \geq \Delta\text{EPNdB} > -14$
■ Category S3	$-14 \geq \Delta\text{EPNdB} > -17$
■ Category S4	$-17 \geq \Delta\text{EPNdB} > -20$
■ Category S5	$-20 \geq \Delta\text{EPNdB} > -23$
■ Category S6	$-23 \geq \Delta\text{EPNdB} > -26$
■ Category S7	$\Delta\text{EPNdB} \leq -26$

If the noise certification values of an aircraft are not available at Amsterdam Airport Schiphol, the noise category will be based on the conservative classification of aircraft types (see page 4).

Cargo flight

A cargo flight is a point-to-point flight operating with the sole purpose of transporting air cargo and/or mail, in the sense that cargo is loaded and/or unloaded at Amsterdam Airport Schiphol.

Handling at a connected stand

Handling of an aircraft which is parked at an aircraft stand at the gate where airlines have the possibility to use a passenger bridge to have passengers cover the distance between the aircraft and the terminal (and vice versa) regardless of the actual use of the passenger bridge.

Handling at a disconnected stand

Handling of an aircraft which is parked at an aircraft stand at the gate or at a remote stand and in which case the airline has no other possibility than to have passengers cover the distance between the aircraft and the terminal (or vice versa) by bus or on foot. The handling of all cargo flights is at a disconnected stand.
